

Docker Commands Cheat Sheet

1. Images

- `docker pull <image>` → Download image from Docker Hub
- `docker images` → List all images
- `docker rmi <image>` → Remove image

2. Containers

- `docker run -it <image> bash` → Run container interactively
- `docker ps` → List running containers
- `docker ps -a` → List all containers (including stopped)
- `docker stop <id>` → Stop container
- `docker rm <id>` → Remove container

3. Build

- `docker build -t <name> .` → Build image from Dockerfile
- `docker exec -it <id> bash` → Run command inside container
- `docker logs <id>` → Show container logs

4. Networking

- `docker run -p 8080:80 nginx` → Map host port 8080 → container port 80
- `docker inspect <id>` → Show container details

5. Volumes

- `docker run -v $(pwd):/app ubuntu ls /app` → Mount host folder
- `docker volume create mydata` → Create named volume
- `docker run -v mydata:/data ubuntu` → Use persistent volume

6. Docker Compose

- `docker-compose up --build` → Start services
- `docker-compose down` → Stop services
- `docker-compose ps` → List services
